

THE DWARF SMALL WOOD STOVE!

The Dwarf small wood stoves are designed specifically for small spaces like: Tiny Houses, cabins, cottages, RV's, tents and boats. The Dwarf is a quality stove with robust features and (3) different sizes / outputs to meet your small space heating needs. The Dwarf features:

FEATURES

- (A) Top or rear flue outlet. Exit out the top for narrow installations or exit out the back to use the entire top for a cooking surface.
- (B) Efficient clean-burn technology with primary and secondary combustion plus air-wash for soot free glass.
- (C) Durable cast iron door and interior firebox components with large viewing window. Cast iron retains heat well and lasts a lifetime!
- (D) Stove burns wood, compressed logs and coal. Comes with coal bar and is ready to burn coal out of the box - no added parts needed.
- (E) Mechanical riddling grate and removable ash pan makes clean up easy and mess free.
- (F) Durable steel body construction uses 6mm & 8mm heavy-duty steel plate.
- (G) Many custom upgrades like tall cast iron legs, wood storage stand and top baking oven (5kw only).
